

Softsource Wins prestigious Hosting & Data Centre Award

Softsource's leading edge Hosting and Data Centre Solution has been recognised at the recent NZ Microsoft Partner Awards by taking first place for delivering exemplary and innovative solutions using Microsoft technologies to address customer's business requirements.

The Microsoft Partner Awards represent the pinnacle of IT industry awards in New Zealand and we were thrilled to have been the only company to be named as an award finalist in ALL of the Core Infrastructure categories

"The Microsoft Partner Awards gives us an opportunity to recognise the fantastic work our partners develop for their clients over the year. It was very exciting to see a number of first-time entries this year, and as usual, the high calibre of entries certainly made the judging process very difficult," says Chris Ichter, Director Small, Midmarket Solutions & Partners Group for Microsoft New Zealand.

Softsource's entrada IaaS Cloud solution offers an interactive self-service portal where you can manage your requirements in real time. This unique cloud service will make your offering more flexible and profitable by giving control back to you and allowing true scalability of virtual server resources 24/7.

Don't take our word for it - TEST DRIVE THE IaaS portal for yourself. First 30 days for FREE.
